

How to read this dashboard

Q1 Beer (1,595 servings) · Q2 Yours Truly (207 vs Jerry's 206) · Q3 Castle Lite (754) · Q4 104 visits · Q5 1 (2019-08-31) · Q6 Yes: 33.24 units/week, 87 of 90 weeks over 14 · Q7 R 21,587.09 saved.

Every tile is a metric defined once in dbt ( transform/models/marts/\_marts.yml ). Each answer is also computed in SQL ( transform/analyses/ ) and independently in pandas, and make test asserts they match. Interpretation choices (what counts as "drunk", "last month", ISO weeks, rounding) are in docs/decisions.md . Tiger's Milk Lager is assumed to be a 1.2-unit beer (D-008), and prices are assumed to be ZAR (D-019).
